

PRESS RELEASE

PageTech Announces the Release of PCLTool SDK v11.0

San Diego, CA. - June 2, 2011: PageTech, the developer of PCLTool SDK, today announced the release of PCLTool SDK v11.0. As the recognized leader in the PCL transformation industry, PageTech continues to meet the evolving PCL transformation demands of developers and businesses worldwide.

With the release of PCLTool SDK v11.0, PageTech now offers its flagship product in two different flavors -- PCLTool SDK 32-bit or PCLTool SDK 64-bit – plus .NET versions of its major programs for each platform. With these two new products, PageTech satisfies the growing needs of clients that are developing solutions for Windows 7, 64-bit and .NET environments, allowing them to take advantage of the different architectures and delivering solutions for a wider range of document imaging systems and platforms.

“We are extremely pleased to add PCLTool SDK 32-bit plus 32-bit .NET and PCLTool SDK 64-bit plus 64-bit .NET to our product line,” says Robert Pooley, president of PageTech. “PCL transformation technology changes so rapidly, that being able to stay on top of emerging technologies is critical for our clients and our business.”

With the addition of PCLTool SDK 32-bit plus 32-bit .NET and PCLTool SDK 64-bit plus 64-bit .NET, PageTech has made a number of enhancements in this latest release.

- **Product Line** – PCLTool SDK is now available in 32-bit or 64-bit versions
- **Source Code** – All program source code was ported over to MS Visual Studio
- **FastFonts** – Replaced multiple, single-byte TrueTypes with single, double-byte fonts
- **PCLXForm** – Added DataMatrix 2D and Intelligent Mail Barcoding functions
- **PCL to PDF** – Added code creating smaller PDFs through embedded font optimization
- **Port Monitor** – Added new 32-bit plus 32-bit .NET and 64-bit plus 64-bit .NET standalone versions
- **Text Extraction** – Improved our exclusive ability to extract text from complex PCL5/PCL6 files
- **PCL Optimization** – Added a standalone GUI program for font optimization in PCL files
- **API/.TPI Functions** – Added many new functions for text extraction and stream editing of PCL
- **PCL to TransPromo** – Improved the ability to de-construct bank statements for re-engineering

The PCLTool SDK v11.0 release note is available on our website at:
